Rainbow Blackjack — Rules

Overview

Two players build 6 coloured towers together. Goal: get each tower as close as possible to a total of 21. Whoever places the last stone in a tower wins the point for that tower.

Material

- 36 coloured stones: 1–6 each in Red, Blue, Yellow, Green, Orange, Purple
- 6 grey joker stones (3 per player)
- Player 1: primary colours (Red, Blue, Yellow) + 3 jokers = 21 stones
- Player 2: secondary colours (Green, Orange, Purple) + 3 jokers = 21 stones

Setup

- The program removes 3 random stones per player. These are not part of the game.
- The first 9 stones are randomly arranged by the program in a 3×3 grid — they stay hidden from your opponent!
- You may look at your own stones and memorise the positions.

Colour Wheel & Adjacency

The 6 colours form a circle:

Red — Orange — Yellow — Green — Blue — Purple

(and back to Red).

Each stone may be placed in its own colour tower

or

in the two neighbouring towers:

- **Red** -> Purple, Red or Orange tower
- **Orange** -> Red, Orange or Yellow tower
- **Yellow** -> Orange, Yellow or Green tower
- **Green** -> Yellow, Green or Blue tower
- **Blue** -> Green, Blue or Purple tower
- **Purple** -> Blue, Purple or Red tower

How to Play

- Each **round** consists of 3 turns.
- At the start of the round each player takes a line in any direction (3 stones) from their grid and announces either the **colours** or the **numbers** (Grey = 0).

- Then the players **take turns placing 1 stone each** in a tower (3 turns per round).
- Each coloured stone may be placed in its **own** colour tower or in the **two neighbouring** towers on the colour wheel. Grey jokers may go in any tower.

Grids & Rounds

- **Rounds 1–3:** stones from the first 3×3 grid. The first line may be chosen freely in any direction, then one of the other two.
- **Rounds 4–6:** the remaining 9 stones are arranged by the program in a new 3×3 grid. The first line may be chosen freely in any direction, then one of the other two.
- The direction once chosen applies to all further rounds in the same grid.

Turn Order

Round 1: P1 starts, Round 2: P2, Round 3: P1, Round 4: P1, Round 5: P2, Round 6: P1. The round starter picks their line first and places a stone first on each turn.

Grey Jokers

- A joker takes on the value of the last stone placed in the tower.
- A joker may **not** be placed as the first stone in a tower.
- Two jokers may **not** follow directly on top of each other.
- **Replacing a joker:** if a joker is on top and you have a coloured stone that comes closer to 21 but would exceed 21 on top of the joker, you may remove the joker and place your own stone.

Scoring

Each tower shows a coloured dot (red = Player 1, green = Player 2) indicating who placed the last stone.

- **Instant win:** whoever first owns 3 towers that each reach exactly 21 wins immediately!
- If nobody reaches 3 towers at 21, whoever owns more towers at the end wins.
